

Sine Wave Filters LC3SWF

The combination of precise three-phase reactors and high performance capacitors guarantees best-in-class motor protection and extended motor life-time. LC3SWF are designed to suit both - line input or load output of drive systems. The modular design and its overall small dimensions make it easy to integrate and install them.

Typical Applications

- Pumps
- Conveyors
- Ventilators
- Compressors
- HVAC applications
- Motor drive with long motor cable
- Retrofit installations with motor drives
- Motor drive with multiple motors in parallel

Feature and Benefits

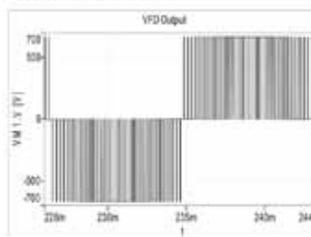

- Provides a sinusoidal output voltage
- Motor protection
- Reduce bearing currents
- Extended motor cable length capability
- Balanced inductance in all three phases
- Possible installation of filters in parallel

Technical Specifications

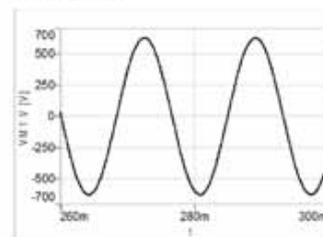

- Rated voltage: 400 Vac (other on request)
- Motor frequency: 70 Hz (up to 200Hz with derating)
- Switching frequency: See filter selection table
- Rated currents: 4,5 A – 1200 A at 40 °C max
- Winding temperature rise class: F
- Insulation class: H
- Working class: F
- Protection category: IP00 (other on request)
- Overload: 1,5 × rated current for 1 minute, once per hour
- High voltage test: 3000 Vac (1 min)
- Altitude Maximum: 1000 m
- Standards: IEC 61558-2-20
